ADVANCED LIQUID ROOFING

## ULTRA-FAST SEAMLESS TECHNOLOGY

Polyroof are the UK's leading manufacturer of ultra-fast seamless cold applied liquid roofing systems.

Every Polyroof membrane is completely seamless, with no welds or weak points. Tough, flexible and suitable for any substrate, our systems are perfect for waterproofing roofs with joints, complex geometry, protrusions and/or tricky detailing.

Our RapidCure technology allows for ultra-fast application under both factory and site conditions, with even complex joints made fully waterproof in under an hour.

Common issues associated with roofs in modular construction such as joint failure, persistent leaks, long installation times and risks from hot works are not an issue when using our liquid systems.

Our industry leading technology is suitable for use in all common build ups, as well as with PV solar cells and green, blue and brown roofing systems. Our low odour systems are also perfect for use in sensitive environments such as schools or hospitals.

# WE ARE THE MODULAR ROOFING EXPERTS

For over 35 years we have assisted our clients in improving and maintaining the performance of their proposed roof build up, providing up-to-date, expert guidance on best practice, legislation, and futureproofing projects.

Fire performance, u-values, drainage, falls, BREEAM ratings, solar reflectivity, embodied carbon... the list goes on. Allow us to help you ensure your roof fulfils the needs of the present and the future.

Polyroof offers a full support service to each of their clients, from conception of the project to completion and throughout the lifespan of the roof. All systems are supported by comprehensive insurance-supported single

point guarantees of up to 25 Years covering labour and materials as standard.

Our systems can be installed by our network of approved roofing contractors, or we can provide comprehensive training for an in-house team of installers, ensuring you get the best solution for your business.

Recent modular projects include state-of-the-art healthcare buildings, sports centres and education buildings of varying sizes and complexity. Amongst the many projects, one of our proudest achievements came as recently as March 2020 when we worked with clients against the clock to construct multiple emergency COVID-19 wards.

## SEAMLESS ROOFING SOLUTIONS

No matter the size, shape or complexity of a roof, Polyroof's liquid systems will form a seamless waterproof membrane across the entire roof area. No joints, no seams, no welds – no weak points.

The finished surface is tough, flexible and impervious to water. With proven lifespans in excess of 25 years, Polyroof systems are the number one choice for all modular construction projects.
