ZERO CO_2

Solar + Hydrogen = No local emissions

ZERO emissions. The Future of site welfare.

AJC EasyCabin

Launched in Feb 2019, the world's 1st hydrogen powered welfare unit.

ZERO emissions. The Future of site welfare.

AJC EasyCabin

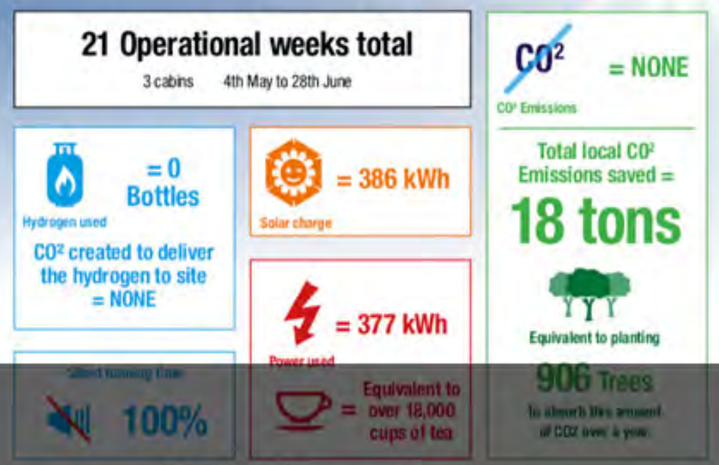
Ecosmart ZERO CO_2

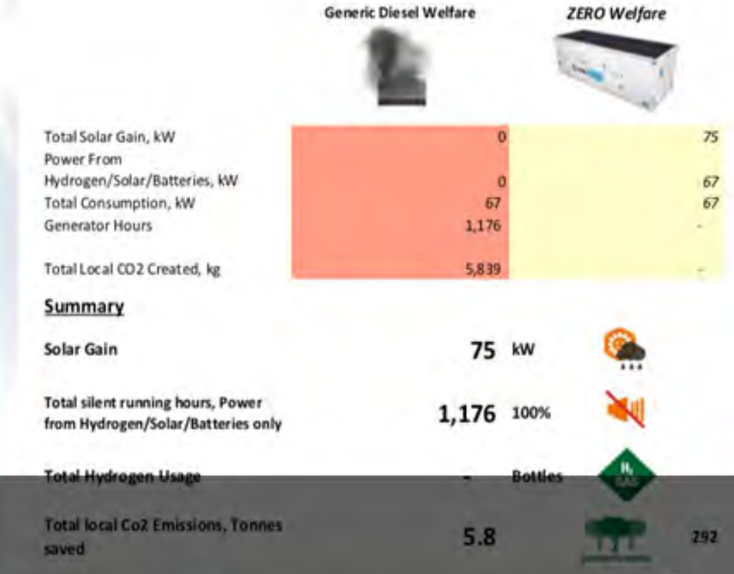
Extensively trialled and proven to work effectively in all seasons UK wide.

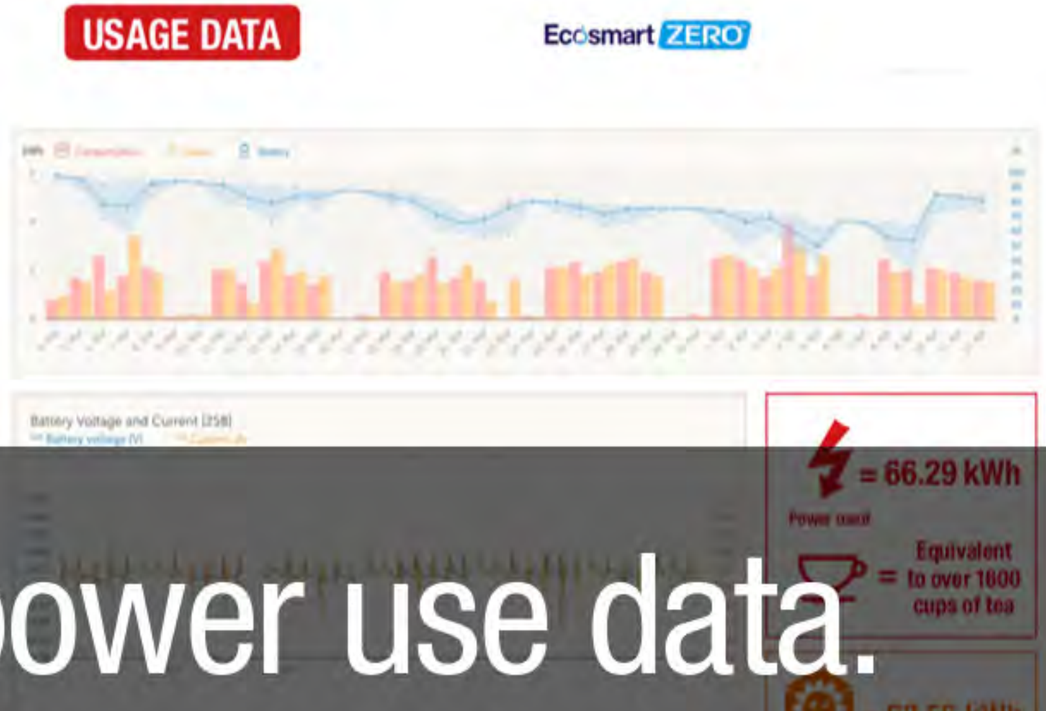
Now used by hire fleet operators and their customers.

ZERO emissions. The Future of site welfare.

AJC EasyCabin







We have 2+ years of power use data.

Available on request.

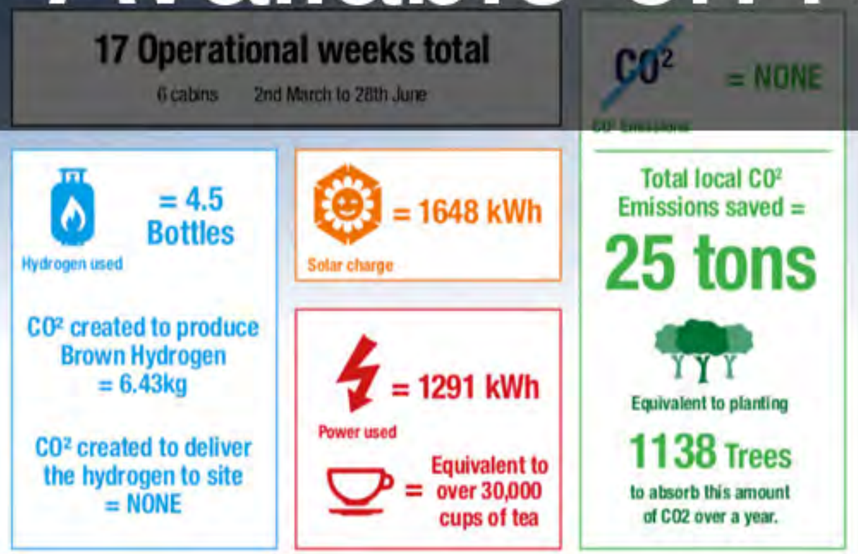
Ecosmart ZERO

Our replacement for traditional diesel power systems, combining solar & hydrogen power to eliminate local carbon emissions.

As a result of winning multiple Green Apple awards, we have been asked by many of our customers to develop site welfare solutions that produce zero emissions at point of use. As a result we have been busy designing, building and testing a new concept, ready for the demands of future CO^2 reduction targets.

Ecosmart ZERO is the first viable welfare alternative for companies that are working to reduce their carbon footprint and, more importantly, improve the environment for communities in the vicinity of operation.

We have had overwhelming demand from large national hire companies to trial the Ecosmart ZERO with end users in the field. It is important that hydrogen and solar alternative fuel solutions are proven to work and provide the same welfare to outdoor workers as a traditionally powered welfare cabins.



ZERO emissions. The Future of site welfare.

AJC EasyCabin

Ecosmart ZERO CO_2

2022 model coming soon

We have been working/testing/developing in the background. We have some major systems updates to further improve performance and efficiency.

ZERO emissions. The Future of site welfare.
