

FLOOR TRIMS

TRANSITION STRIPS FOR FLOOR FINISHES

GRADUS

Why Gradus

Quality, performance and service are at the heart of everything we do. Founded in 1966, Gradus has over 50 years of extensive knowledge and is the market leader offering the widest choice of flooring accessories.

Gradus are committed to helping you and your customers every step of the way. Whether it's advice on product selection or simply just the assurance of delivering the right product to the right place at the right time, we can offer you complete piece of mind through our dedicated Sales and Technical Support teams should you ever need us.

Contents

Our "Floor Trims" brochure showcases selected Gradus profiles ideal for use with LVT or other types of modular flooring such as woods, ceramics and carpet tile.

It encompasses a wide range of trims, to not only provide solutions for common everyday occurrences, but also for those unusual installation scenarios that you may encounter from time to time where a specialist type of trim is needed.

To view the full Gradus range, visit our website at www.gradus.com for more information. Here you'll find further details on individual profiles and have access to download any supporting literature such as installation instructions and cleaning & maintenance guidelines.

Floor Trims

Floor trims help to reduce the risk of accidents by providing a safe transition between floorcoverings. They can also provide a safe joint where wheeled traffic is expected, ensuring that trolleys can move freely between different types and heights of floorcovering.

Gradus offer floor trims in a variety of shapes and sizes to suit an array of floorcoverings ranging from LVT, woods, ceramics and other types of modular flooring.

We understand that selecting the right trim can sometimes be a complex process and it's important to always consider a combination of the safety, performance and aesthetic requirements for your intended application.

What to consider when selecting a Floor Trim?

01 Safety

- The type of environment?
 - Is the area prone to spillages or wet floors?
- If carpet or carpet tile is present, have you considered its compressed thickness?
 - What type of profile is needed – i.e. ramp top, twin top, one-piece or two-piece etc?

02 Performance

- Volume of pedestrian traffic anticipated?
 - Any likelihood of wheeled traffic?
- Cleaning and maintenance regimes expected?
 - Is a gap for natural expansion required?

03 Aesthetics

- Any particular colours, finishes or materials preferred?
- Would you like the floor trim to blend in with the surrounding environment or act as a highlight to define a walkway or breakout area for example?
 - Is a straight or curved floor trim required?

For Trans-Edge Trims see page 19 for details of insert types and colour availability.

Please note: Due to the limitations of the printing process, colours within this catalogue should not be relied upon for colour matching. An accurate colour match can only be achieved by requesting the relevant product sample(s) from Gradus Technical Support on 01625 428922.

Transition Strips

Whether it's for use with LVT or a different type of modular floorcovering such as woods, ceramic tile or carpet tile, our transition strips help to reduce the risk of accidents by providing a safe and neat junction.

Gradus offers a comprehensive selection of everyday profiles ranging from our popular Clip-Top, Clip-Top fx, MTS, Mono-Clip, PPS and Trans-Edge ranges, through to more specialist trims designed to suit particular situations that you may only encounter occasionally.

Our range includes profiles in ramp configurations for joining floorcoverings of differing heights, "twin tops" ideal for floorcoverings of the same or similar heights, profiles for installing directly up to skirting and a variety of one-piece or two-piece profiles depending on the amount of flexibility that may be required.

Curving

- Many of the Gradus trims in this section can easily be curved by hand, however some trims require a bending machine.
- To rent, buy or for more information about bending machines please contact Technical Support on 01625 428922.

- Key**
-  Can be curved by hand.
 -  Bending machine required.

TT35/AFT15

Gradus Clip-Top TT35/AFT15 profile installed at junction between loose lay LVT and carpet tile.

Luxury Trim System

Designed to create an elegant, luxurious appearance within medium traffic applications such as luxury hotels and premium residential developments, these solid brass tops are available in a choice of six premium finishes and are the perfect complement for LVT and other types of modular flooring.

SFBR37/AFT3912 wood flooring to LVT.

SFBT29/AFT708 wood flooring.

Installation Advice

- Compressed thickness of carpet should always be a tight fit to the internal gauge of the combined top/base
- Where appropriate a suitable gap must be left between the profile base and the flooring to allow for natural expansion
- Bases should always be fitted on top of resilient floorcoverings when used in a ramp configuration
- Bases should be fitted using cartridge adhesive and screw fixings

MTS Multi-Trim System™ – PVC-u & Aluminium

A versatile and simple solution ideal for common interfaces within medium pedestrian and trolley traffic applications such as high street shops, schools, hotels and offices. Available with either PVC-u or aluminium tops, their two-piece construction enables MTS Multi-Trim System to be used with a variety of different floorcoverings including LVT, woods, ceramics and carpet tile.

Installation Advice

- Compressed thickness of carpet should always be a tight fit to the internal gauge of the combined top/base
- When installed with ceramics, wood or wood laminate flooring a suitable gap must be left between the profile base and the flooring to allow for natural expansion
- Bases should be fitted using cartridge adhesive and screw fixings

PTR1/MPTB5 ceramic tile to LVT.

Dimensions shown are nominal. Illustrations are 70% size in mm. Products subject to minor design alterations without notice.

Clip-Top™

These two-piece profiles allow design flexibility in heavy pedestrian and medium wheeled traffic environments including department stores, high street shops, hospitals, schools, hotels and offices. The tops can be replaced so that the colour can be altered as part of a refurbishment programme, or if a worn or damaged section needs to be changed, without renewing the base or disrupting the fitted floorcovering.

Installation Advice

- Compressed thickness of carpet should always be a tight fit to the internal gauge of the combined top / base
- Clip-Top bases should always be fitted on top of the resilient floorcovering when used in a ramp configuration
- Bases should be fitted using cartridge adhesive and screw fixings

Curving Clip-Top

Curves between the minimum and maximum radii can be factory fabricated subject to approval of template or detailed drawing (showing radius details) by the Technical Department. Curves greater than the maximum radius can be curved on-site or by Gradus on request. Curves less than the minimum radius cannot be curved.

Clip-Top fx®

Featuring a two-piece design, our Clip-Top fx profiles are suitable for medium pedestrian and wheeled traffic applications including high street shops, schools, hotels and offices. They are particularly suited for applications where a regular refurbishment programme is expected or added flexibility to change tops is preferred. A choice of bases are available with aluminium for straights or PVC-u for curves to allow easy forming on-site without the need for any heat application.

Installation Advice

- Compressed thickness of carpet should always be a tight fit to the internal gauge of the combined top / base
- Clip-Top fx bases should always be fitted on top of the resilient floorcovering when used in a ramp configuration
- Bases should be fitted using cartridge adhesive and screw fixings

FXT31/FXB336 wood laminate to LVT.

PVC-u bases are pre-punched with tabs and fixing holes for on-site curving. Latex screed should be used with LVT floorcoverings to prevent the pre-punched base shadowing through.

Aluminium bases have a solid flange for straight lengths.

Design-Clip

Provides a neat finish at junctions between hard floors such as LVT, wood and wood laminate, whilst also allowing room for natural expansion. Our Design-Clip profiles are suitable for use within medium traffic environments including commercial offices, hotels and restaurants.

Installation Advice

- Bases should be fitted using cartridge adhesive and screw fixings.
- When installed with floorcoverings that require room for natural expansion, a suitable gap must be left between the profile base and the floorcovering to allow for that expansion.

CODE / PROFILE	MATERIAL	LENGTH	COLOURS / FINISHES

Dimensions shown are nominal. Illustrations are 70% size in mm. Products subject to minor design alterations without notice.

PPS® System

These two-piece profiles feature a unique patented linking screw enabling them to accommodate various heights of modular floorcoverings including LVT, whilst also allowing room for natural expansion where necessary. This range is ideal for use within medium traffic applications such as commercial offices and restaurants.

Installation Advice

- Bases should be fitted using cartridge adhesive and screw fixings.
- When installed with floorcoverings that require room for natural expansion, a suitable gap must be left between the profile base and the floorcovering to allow for that expansion.

NEW Mono-Clip® System

Mono-Clip is a range of two-piece profiles available in wood effect finishes for use with wood and wood laminates. Tops can be clipped into bases at varying heights to accommodate a variety of floorcoverings. Mono-Clip profiles are suitable for use within medium traffic applications such as commercial offices and restaurants.

Installation Advice

- Bases should be fitted using cartridge adhesive and screw fixings.
- When installed with floorcoverings that require room for natural expansion, a suitable gap must be left between the profile base and the floorcovering to allow for that expansion.

Trans-Edge® – Trims

Designed for the most demanding environments our Trans-Edge range is ideal where frequent heavy foot and wheeled traffic can be expected such as railway stations, airports and hospitals. Trans-Edge trims comprise an aluminium base channel with a choice of slip-resistant Elite inserts (ordered separately). Standard interior insert is available for interior dry conditions. Xtra-grip insert is available for interior areas that are at risk of becoming wet.

Installation Advice

- Aluminium channels are fixed using screws and cartridge adhesive. Elite insert is then fitted into channel to allow concealed fixings
- If used with carpet, compressed thickness of carpet should always be a tight fit to the internal gauge of the profile
- When installed with ceramics, wood or wood laminate flooring a suitable gap must be left between the profile and the flooring to allow for natural expansion
- Ramp profiles should always be fitted on top of resilient floorcoverings

Nap Trims

Typically used when joining carpet, carpet tile or traditional carpet with underlay to a hard floorcovering such as LVT, wood laminate or ceramics. Nap Trims allow the edges of the carpet to be concealed, resulting in a neat finish whilst also protecting the raw edges.

CG1042 ceramic tile to carpet.

Square Edge Trims

Useful for hiding any slight imperfections in joints or cuts, these profiles are compatible for use with a variety of modular flooring types including LVT, carpet tile, wood and wood laminate at a junction with other flooring materials such as carpet, ceramics and wood. We supply selected profiles with pre-punched bases and tabs for on-site curving as indicated below.

Finishing Trims

Used to form a neat and clean finish to the edge of a floorcovering where it either finishes or meets another floorcovering. Finishing trims protect the raw edge of floorcoverings, thus extending the life of the floorcovering. In addition, they ensure a safe transition and prevent the edge of the floorcovering from becoming a trip hazard.

ET356 stone floor to LVT.

Joint Trims

Provide a neat junction between two floorcoverings of the same height, for instance where a wood effect LVT meets a mineral effect LVT. These profiles also protect the edges of the floorcoverings and provide a safe transition. Profiles are available pre-drilled with countersunk fixing holes or pre-punched with tabs and fixing holes for on-site curving as indicated below.

JT365 LVT to LVT.

Transition T Profiles

Designed for joining floorcoverings of the same, or slightly differing, heights, our Transition T profiles allow any slight imperfections to the joints and cuts to be hidden. They allow a gap for natural expansion and can also be curved on-site using a bending machine for shaped edges. To rent, buy or for more information about bending machines, please contact our Technical Support department on 01625 428922. An additional benefit of this range is that it can be fitted after the floorcoverings have already been installed, making these an ideal solution where different trades have installed each floorcovering, e.g. ceramics contractors and flooring contractors.

Ramp Edges – Pvc & Aluminium

Ideal for joining a variety of floorcoverings ranging from LVT, woods or carpet tile to floorcoverings of a lower height such as stone, concrete or resilient flooring. Our Ramp Edge profiles ensure a safe transition between floorcoverings and protect the edges to minimise the risk of damage.

Multi-Purpose Trims

Our collection of Multi-Purpose Trims offers incredible versatility with a wide selection of sizes available to suit floorcoverings ranging from LVT to wood flooring.

Featuring a reduced visible surface, these profiles are ideal for areas where a clean, subtle transition is required, allowing the trim to blend in with the surrounding environment and floorcoverings.

A choice of aluminium, stainless steel and brass finishes are available, allowing you to choose a trim that best suits your particular application.

We offer three base options, which are highlighted next to each profile by the relevant symbol (symbol key can be found on page 32):

- Solid base suitable for straights.
- Pre-punched base with tabs and fixing holes for on-site curving.
- Perforated base with fixing holes for straights and use with ceramics.

Cover Strips

Our collection of Cover Strips are designed for joining floorcoverings of a similar thickness and are typically used at door thresholds where two floorcoverings meet.

Not only do they ensure a neat and safe junction between floorcoverings, but they also help to protect the exposed edges of the floorcoverings from damage.

A variety of Cover Strips are available with a choice of central or side-drilled countersunk fixing holes. AJC profiles offer superb flexibility and can also be used as expansion joint covers where required.

Profiles are available in a selection of materials including stainless steel, brass and aluminium, complemented by a great choice of finishes including mill, matt, silver anodised or polished to suit your specific needs.

Skirting & Coving

Our skirting & cove formers provide a neat, clean and safe solution for junctions where the floor meets the wall. Gradus profiles are the perfect complement for any LVT and other types of modular floorcoverings such as woods, ceramics and carpet tile.

Below are a variety of considerations to help ensure that you select the appropriate skirting or coving profile for the job at hand.

What to consider when selecting a Skirting or Coving?

- The type of environment?
- The type of floorcovering(s) and the thickness of these?
- Is there a requirement for the floorcovering to continue up the wall?
- Any additional functionality requirements such as concealing cables?
- Number of end caps, junctions, external or internal corners and any other accessories required?
 - Is “wall-to-floor expansion” necessary?
- What specific look are you intending to achieve?
- Does the skirting ideally need to sit on top of the floorcovering?
 - Is there a particular colour or finish required?

MAS90 Aluminium Skirtings

These silver anodised aluminium profiles create a modern hi-tech finish and are designed to sit on top of floorcoverings. The capped toe design makes them a great solution for hiding wall-to-floor expansion gaps.

A selection of metal accessories including end caps, junctions and corners are also available for our MAS90 profiles, all supplied in a silver anodised finish to ensure neat and tidy finishing on site.

MAS90 profiles are fixed to the wall using appropriate adhesive.

All accessories are supplied in packs of 4 except for End Caps which are supplied as 4 sets of 2 (one left hand and one right hand).

MSS790 Stainless Steel Skirtings

Featuring a stainless steel satin finish, this range is ideal for use in areas where a modern hi-tech finish is required. Designed to sit on top of a variety of floorcoverings, the capped toe design allows wall-to-floor expansion gaps to be hidden.

A choice of metal accessories including end caps, junctions and corners are also available in a satin finish for a consistent look.

MSS790 profiles are fixed to the wall using appropriate adhesive.

MAS95 Interlocking Aluminium Skirtings

Ideal for use in areas where a modern finish is required, these silver anodised aluminium profiles feature interlocking aluminium brackets and are suitable for most types of modular floorcoverings including LVT, carpet tile, wood, wood laminate and ceramic tiles. The design allows low voltage cables for computers or telephones to be concealed behind the skirting profile and out of view for a clean look.

We offer a variety of accessories such as end caps, junctions and corners in a silver finish PVC-u to co-ordinate with our MAS95 profiles.

MAS95 profiles are fixed to the wall using screw fixings.

MAS97 Interlocking Aluminium Skirting

Suitable for use in areas where a modern finish is required, the MAS97 range features a silver anodised aluminium finish to complement a range of modular floorcoverings including LVT, carpet tiles, wood, wood laminate and ceramic tiles. Designed with interlocking aluminium brackets, these profiles are ideal for use within applications where low voltage cables for computers or telephones need to be concealed.

We offer a variety of accessories such as end caps, junctions and corners in a silver finish PVC-u to co-ordinate with this range of profiles.

MAS97 profiles are fixed to the wall using screw fixings.

Aluminium Cove Formers

Aluminium Cove Formers are perfect for use with LVT as they allow the flooring material to be covered up the wall to create a neat finish where the two meet. Our Aluminium Cove Formers are supplied in two profile designs featuring several anodised finishes, ideal for use within premium environments.
